1. Applicant's election of Group I, claims 1-11 in the response filed 27 August 2004 is noted. The restriction requirement has been withdrawn in view of the actual search preformed. All claims have been examined.

2. The following is an examiner's statement of reasons for allowance: the features of the key top being secured to a raised piece of resin film at the side of the key top in claim 1 and the feature of the hole edge portion facing the inner surface of the cavity in which the key top is formed in claim 12 in combination with the other respective limitations of claims 1 and 12 define over the cited art. In particular Wolfe et al. (US 2004/0086687 A1) teaches hole edge portions that are inside the molded key top and therefore not secured to the side of the key top or on the inner surface of the cavity which molds the key top. Burgett (U.S. 5,684,279) and Ando et al. (U.S. 6,388,218 B1) teach films with holes with key tops in the holes, but do not secure the film to the key top. Chen (U.S. 5,340,956) teaches a raised portion of a film secured to the side of a key top but does not teach a hole in the film.
